

My Name _____

BUILD A HILL

Materials

1. Gently wrinkle foil. Place in the bottom of a cake pan.

2. Soak sponge in water. Squeeze water above foil.

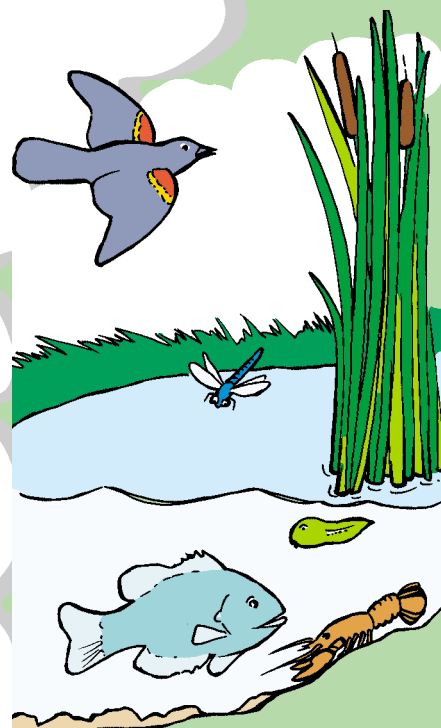

3. Where does the water go? Uphill or downhill?

The foil is like hills and the water is rain. The next time it rains, watch where the water goes.

Wild FACT In spring, frogs and turtles wake up. They rest all winter deep in the mud at the bottom of the pond.

BACK IN
TIME

People build ponds. Before ponds, Missouri only had rivers and streams.

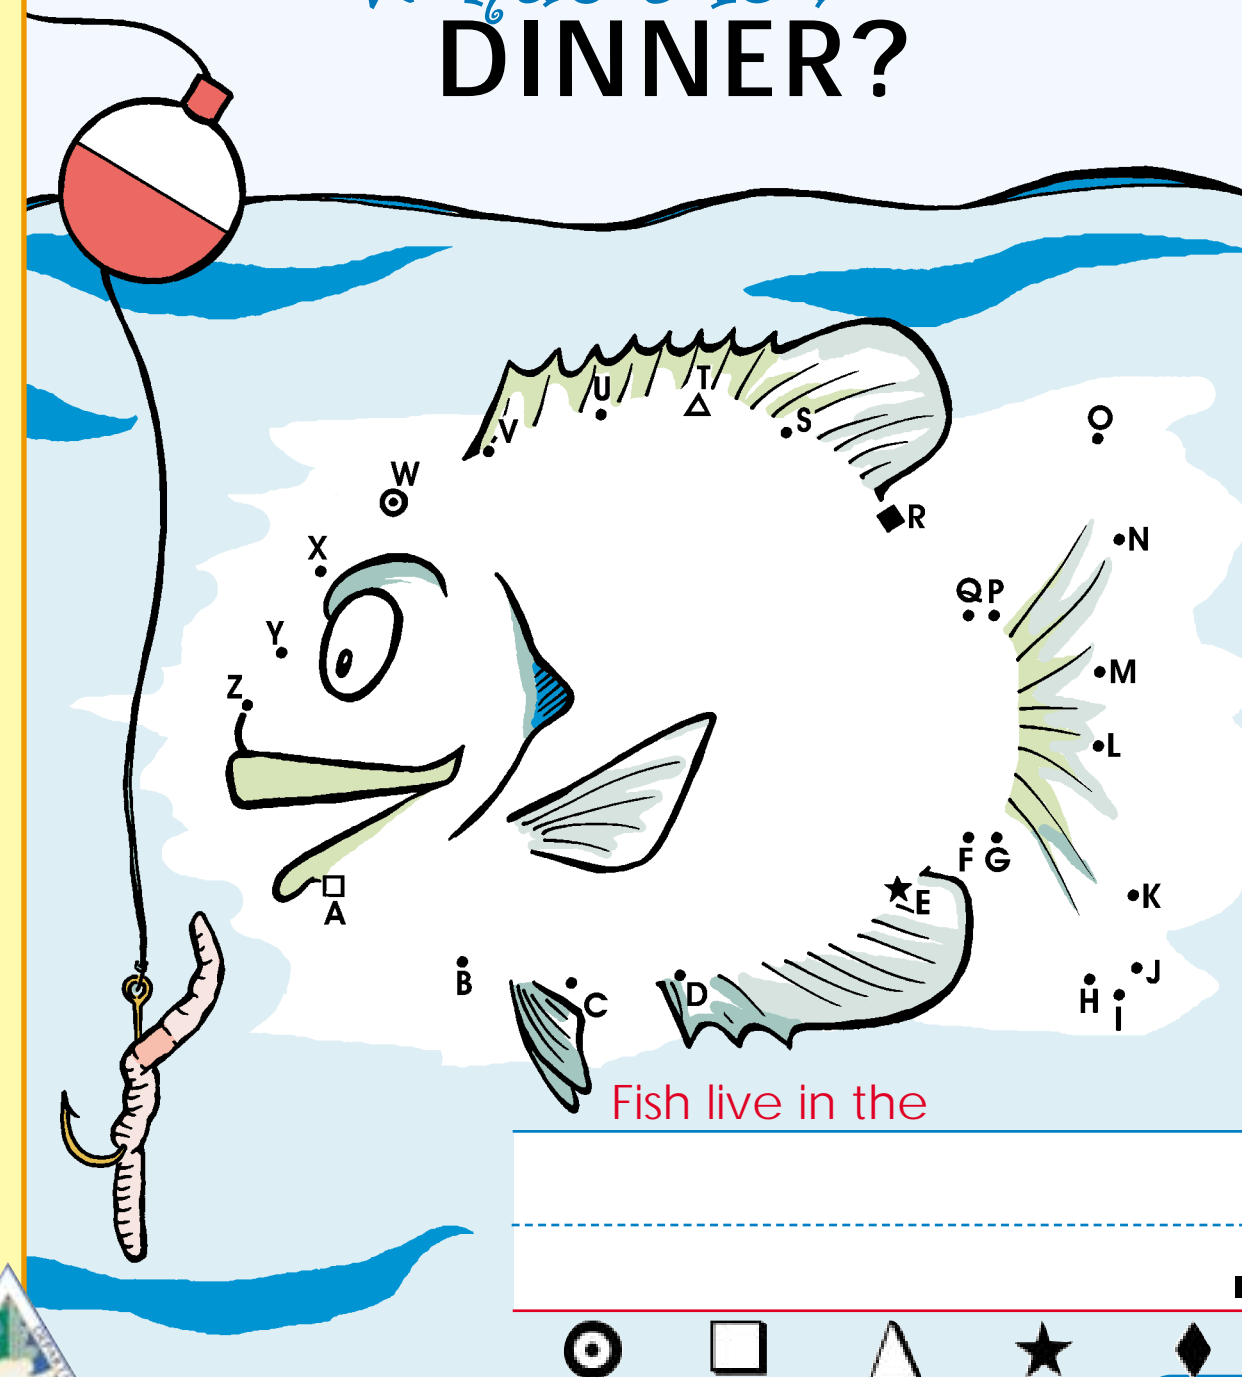

Ponds become wild places where many animals live.

SPRING

Woollyworm

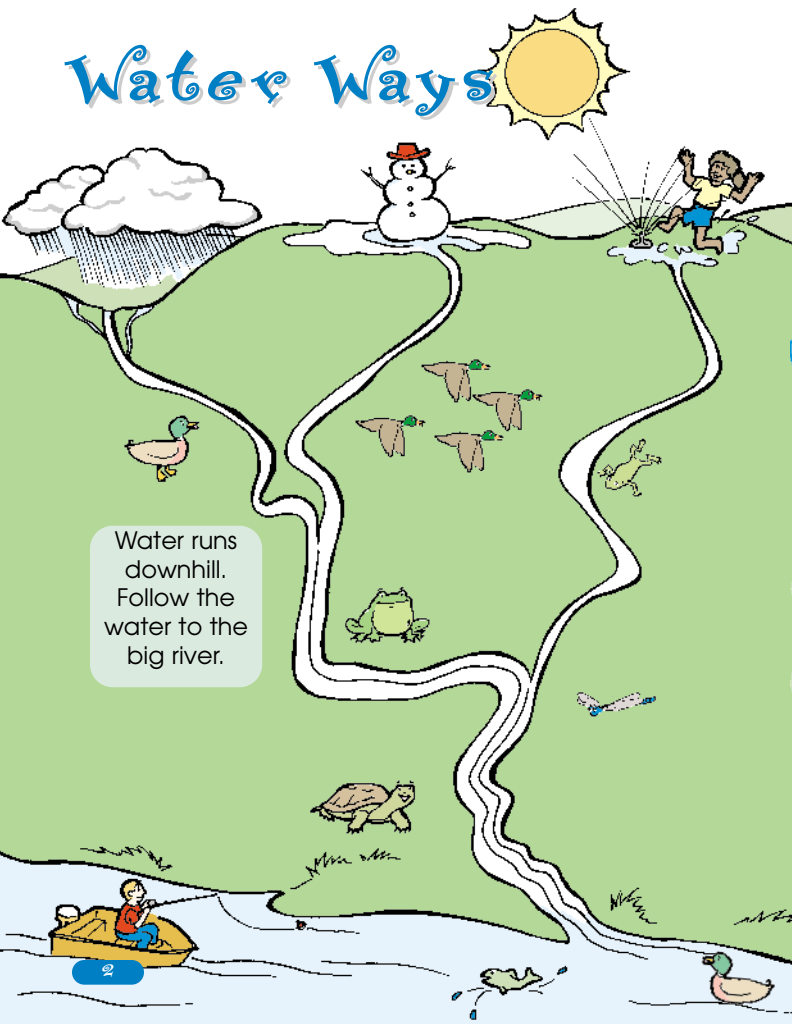

What's for
DINNER?

Fish live in the

Water Ways

Happy Spring!
